

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

Claim 1 (canceled).

2 (new). A method comprising subjecting a zinc alloy to the casting-and-rolling process to prepare strips and plates as structural zinc, wherein the zinc alloy contains:

- a) 8 to 15% by weight of aluminum;
 - b) a first alloy component selected from the group consisting of
 - from 0.002 to 0.4% by weight of titanium,
 - from 3 to 100 ppm of boron,
 - from 3 to 50 ppm of magnesium, and
 - a combination thereof;
 - c) a second alloy component selected from the group consisting of
 - from 3 to 100 ppm of carbon,
 - from 2 to 500 ppm of vanadium,
 - from 2 to 500 ppm of silicon,
 - from 2 to 500 ppm of nickel, and
 - a combination thereof; and
 - d) the balance being zinc,
- and optionally

from 0.002 to 0.4% by weight of indium,
from 0.002 to 0.4% by weight of calcium,
from 0.05 to 0.8% by weight of manganese, or
a combination thereof.

but containing

- e) less than 0.1% by weight of copper,
- f) less than 0.1% by weight of iron, and
- g) lead only as an unavoidable impurity
